SQL Injection

This is going to be a cheat sheet for different types of SQL Injection vulnerabilities. Since I also have to improve my knowledge about SQL and types of SQL injections, it will take some time to learn about all of it and update this file but I will update the more I continue to learn. It's all about the process, sharing and trying to be useful to all the beginners that's getting into this exciting field. Please share any ideas, recommendations etc.

Bypassing Login Screens

```
' or 1 = '1'; -- xx'
' or 1 = '1'; --
```
